## Operational Memo 2011-01

To: All Personnel

Date: November 2, 2011

Re: Grand Strand Regional Medical Center STEMI Transports

Grand Strand Regional Medical Center has placed, in service, their new Cath Lab Facility on the first floor.

Until further notice all STEMI patients will be brought through the ER entrance. There you will either be received by ER staff or escorted to the new Cath Lab by a respiratory therapist. You will be required to bring your cardiac monitor and medical bag until such time the patient is transferred to hospital staff. We are making these adjustments to ensure seamless care during this time of transition. You will be updated as this procedure changes with the hospital.

The plastic cards that were placed on your cardiac monitors with GSRMC information can be removed. The information on them is no longer valid.
