MAINTENANCE BULLETIN

APPROVED BY GARRY ALDERMAN, FIRE CHIEF:

A handwritten signature in black ink, appearing to read "Garry Alderman", written over a horizontal line.

DATE: February 3, 2009

MB 09-001

Maintenance Tagging Procedures for Self Contained Breathing Apparatus

When Self Contained Breathing Apparatus (SCBA) equipment needs repair or testing a Red Repair Tag shall be filled out and attached to the defective equipment. This tag shall be attached to the equipment using the wire tie that is supplied with the tag. At no time shall HCFR personnel attach Repair Tags or repair notes to SCBA equipment with any other method. This includes tape and/or glue. Tape and/or glue may cause unrepairable damage to the SCBA equipment, especially face pieces and cylinders, when it is removed.

The Company Officer shall ensure that the Repair Tag is completed and attached to the equipment by using the wire tie supplied with the tag. Repair Tags can be requested through the HCFR Procurement Division.

This bulletin is also posted on the department's website. You can review it on-line by going to www.horrycountyfirerescue.com. It is filed under the Member's Only/Member Information menu in the Admin Communications section.
